EDUCATION

University of San Carlos

Bachelor of Science in Computer Science

PROJECT EXPERIENCE

AI-Powered Charades System

AI Full Stack Engineer

Dec 2025 - Present

- Engineered a real-time gesture recognition system using **MediaPipe** and **Web Workers**, simultaneously tracking **54 skeletal keypoints** (21 hand + 33 body) while maintaining a stable **30 FPS** performance in the browser.
- Integrated **GPT-4 Vision API** to analyze visual inputs every **2 seconds**, achieving a **95% gesture detection accuracy** rate and an **80% success rate** for correct Artificial Intelligence guesses within the 30-second time limit.

F1 Telemetry Speed Analysis Dashboard

Data Analyst

Oct 2025 - Dec 2025

- Leveraged the **FastF1** Python library to process over **10,000+ telemetry data points** per race, analyzing speed, throttle, and brake traces to identify lap time deltas with **0.01s precision**.
- Developed interactive visualizations using **Matplotlib** and **Seaborn**, allowing for comparative analysis of driver performance that reduced post-race strategy review time by **50%**.

AI Image Classifier

Machine Learning Engineer

Sep 2024 - Oct 2025

- Engineered a **Convolutional Neural Network (CNN)** using **TensorFlow**, achieving **95% validation accuracy** across 10+ distinct object categories during live testing.
- Integrated the model into a **React** web application via a RESTful API, optimizing the inference pipeline to deliver real-time predictions in **under 300 milliseconds**.

Personal Finance Dashboard

Full-Stack Engineer

Nov 2024 - Oct 2025

- Engineered a RESTful API to ingest and categorize **1,000+ transaction records**, reducing manual data entry time by **85%** and ensuring real-time budget tracking accuracy.
- Deployed a containerized application using **Docker** and **GitLab CI/CD**, cutting deployment setup time by **40%** and maintaining **99.9% uptime** during stress testing.

Order Management System

Full Stack Developer

Oct 2024 - May 2025

- Developed a centralized, multi-platform solution (Web, Android, Desktop) using **React** and **Electron**, streamlining daily operations for **3 distinct user roles** and reducing manual order processing time by **40%**.
- Engineered an **offline-first architecture** using **IndexedDB** and local caching to ensure **100% operational uptime** during internet outages, implementing a background sync mechanism that guarantees data integrity upon reconnection.

SKILLS

Languages: Python, Java, SQL (PostgreSQL, MySQL), TypeScript, JavaScript (React.js, React Native), HTML/CSS.

Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch, OpenCV, FastF1, ETL Pipelines.

Tools: Docker, Git/GitHub/GitLab, CI/CD, Jupyter Notebook, VS Code, Postman.

CERTIFICATIONS

- Oracle Cloud Infrastructure Generative AI Professional** | Oracle
- Google Data Analytics Professional** | Google
